

KODYE W. PUGH

Arlington, VA | (813) 751-7290 | kodyepugh@alumni.stanford.edu | kodyepugh.com

Analyst and digital product professional with experience redesigning a federal task-tracking workflow, building CMS structures and information architectures for three client organizations, and analyzing more than 15 million rows of wellness data in BigQuery. Uses SQL, Excel, Tableau, Python, requirements analysis, and stakeholder communication to clarify operational problems, improve processes, and support data-informed decisions.

SKILLS

Data & Analytics: SQL, BigQuery, Excel, Tableau; data cleaning, data validation, exploratory analysis, aggregation, visualization, reporting

Product & Operations: business analysis, requirements analysis, process improvement, workflow design, information architecture, project coordination, stakeholder communication, presentation

Programming & Web: Python, Git/GitHub, HTML/CSS, JavaScript, Velo, Wix Studio, Wix CMS, WordPress

SELECTED DATA ANALYTICS PROJECT

Bellabeat Wellness-Behavior Analysis Independent Data Analytics Case Study

2026

- Built a reproducible workflow for 29 Fitbit source tables and more than 15 million rows. Used Excel for source inspection, BigQuery/Standard SQL for profiling, transformation, joins, aggregation, and validation, Python for exploratory analysis, and Git for version control.
- Preserved raw source data and separated the workflow into staging, cleaned, analytical, and reporting layers; investigated duplicate boundaries, uneven feature coverage, unresolved user identity, and differences among daily, hourly, minute, and second-level records before defining defensible analytical units.
- Analyzed 1,935 observed activity session-days and found that light activity accounted for 84.9% of active minutes; used the finding to frame testable Bellabeat app hypotheses around personal baselines, approachable movement, and user-controlled timing.
- Used sensitivity testing to rule out unsupported segmentation and causal claims; documented the study's limits and the additional data needed for future product experiments, and kept the analysis traceable from source data through QA and publication.

PROFESSIONAL EXPERIENCE

Independent Web & Digital Product Consultant Client Website Reconstruction & Product Support

2025 - Present

- Reconstructed three client websites from stakeholder requirements, designing clear information architectures, CMS structures, content workflows, responsive interfaces, and maintainable production sites.

CIF Oakland City Section

- Configured structured relationships in Wix CMS among sports, schools, tournaments, participating teams, tournament rounds, and games to support schedules, results, standings, championships, and public communications.
- Design and maintain workflows for schedules, results, standings, and playoff brackets within Wix's platform constraints as organizational, content, and functionality needs evolve.

Workforce Development Unit

- Turned an incomplete Wix implementation with placeholder content, unclear navigation, inconsistent branding, missing service information, and usability gaps into a production-ready site organized around education pathways, workforce development, leadership, partnerships, and consulting services.

GospelFest Oakland

- Reconstructed the site as an event platform for ticketing, fundraising, sponsorship, artist outreach, and visitor information. During the event cycle, the organization met its fundraising goal and sold all available tickets; the site also generated inquiries from 28 local artists.

U.S. Department of Education - Federal Student Aid

Management & Program Analyst, Digital Delivery Division | Washington, DC

- Identified a process-control weakness in an Excel task tracker that required employees to interpret assigned dates and manually update color-coded status indicators.
- Redesigned the tracker with date-based conditional formatting to automatically flag approaching and missed deadlines; secured supervisor approval and led a team walkthrough of the revised workflow.

Jan 2025 - Feb 2025

Netflix Productions

Director's Assistant | Los Angeles, CA

Monster(s): The Lyle and Erik Menendez Story - Episodes 201 & 202

- Served as liaison between director Carl Franklin and production departments on a multimillion-dollar television production, coordinating time-sensitive communication across teams.
- Coordinated housing, technology, equipment, and other off-set operational requirements alongside changing production schedules.
- Managed and reported recurring expenditures for the director's off-set operations, maintained accurate records, and supported day-to-day decisions.

Oct 2023 - Mar 2024

ADDITIONAL EXPERIENCE

Various Production Companies

Freelance Set Production Assistant | Los Angeles, CA

- Coordinated real-time communication between production leadership and on-set teams, relayed changing requirements, managed production areas, and responded to time-sensitive logistics.
- Selected credits: Oppenheimer, Poolman, Monster: The Jeffrey Dahmer Story, and other feature and television productions.

2021 - 2023

Stanford University & Loyola Marymount University

NCAA Division I Men's Basketball Student-Athlete

- Five-year NCAA Division I student-athlete; three-time Pac-12 All-Academic selection and NABC Honors Court honoree.

2016 - 2021

EDUCATION

Loyola Marymount University

Master of Fine Arts, Film & Television Production (Directing Fiction)

2024

Stanford University

Bachelor of Arts, Film & Media Studies (Film, Media and Technology)

Relevant technical coursework: Programming Methodology, Programming Abstractions, Calculus I-III, Introductory Electronics I-II
