

KODYE W. PUGH

Arlington, VA | (813) 751-7290 | kodyepugh@alumni.stanford.edu | kodyepugh.com

Analyst and digital product professional who redesigned a federal task-tracking workflow, built CMS structures and information architectures for three client organizations, and developed a validated BigQuery analysis across more than 15 million wellness data rows. Combines SQL, Excel, Tableau, Python-supported workflows, requirements analysis, and stakeholder communication to turn ambiguous operational needs into reliable systems, defensible insights, and actionable recommendations.

SKILLS

Data & Analytics: SQL, BigQuery, Excel, Tableau; data cleaning, data validation, exploratory analysis, aggregation, visualization, reporting

Product & Operations: business analysis, requirements analysis, process improvement, workflow design, information architecture, stakeholder communication, presentation

Programming & Web: Python, Git/GitHub, HTML/CSS, JavaScript, Velo, Wix Studio/CMS, WordPress

SELECTED DATA ANALYTICS PROJECT

Bellabeat Wellness-Behavior Analysis

2026

Independent Data Analytics Case Study

- Built a reproducible analytical workflow for 29 Fitbit source tables and more than 15 million rows using Excel, BigQuery/Standard SQL, Python-supported workflows, and Git to profile, transform, join, aggregate, and validate data.
- Separated preserved source data from staging, cleaned, analytical, and reporting layers; investigated duplicate boundaries, inconsistent feature coverage, unresolved user identity, and differences across daily, hourly, minute, and second-level observations before defining defensible analytical units.
- Across 1,935 observed activity session-days, found that light activity represented 84.9% of active minutes and translated the result into testable Bellabeat app hypotheses around personal baselines, approachable movement, and user-controlled timing.
- Used sensitivity testing to reject unsupported segmentation and causal claims; documented analytical boundaries and additional telemetry needed for product experimentation while preserving traceability from source data through QA and publication.

PROFESSIONAL EXPERIENCE

Independent Web & Digital Product Consultant

2025 - Present

Client Website Reconstruction & Product Support

- Reconstructed three client websites, translating stakeholder and organizational requirements into information architectures, CMS structures, content workflows, responsive interfaces, and maintainable production websites.

CIF Oakland City Section

- Configured structured relationships in Wix CMS across sports, schools, tournaments, participating teams, tournament rounds, and games to support schedules, results, standings, championships, and public communications.
- Designed and iterated workflows for schedules, results, standings, and playoff brackets within platform constraints; continue to maintain the production site as organizational, content, and functionality requirements evolve.

Workforce Development Unit

- Converted an incomplete Wix implementation with placeholder content, unclear navigation, inconsistent branding, incomplete service information, and usability gaps into a production-ready site; reorganized navigation and content around education pathways, workforce development, leadership, partnerships, and consulting services.

GospelFest Oakland

- Reconstructed an event platform supporting ticketing, fundraising, sponsorship, artist outreach, and visitor information; during the event cycle, the organization met its fundraising goal and sold all available tickets, while the site generated inquiries from 28 local artists.

U.S. Department of Education - Federal Student Aid

Management & Program Analyst, Digital Delivery Division | Washington, DC

- Identified a process-control weakness in an Excel task tracker whose status indicators required employees to interpret assigned dates and manually update red/yellow/green cell formatting.
- Redesigned the tracker with date-driven conditional formatting to automate status signaling and surface approaching and missed deadlines; secured supervisor approval and led a team walkthrough on the revised workflow.

Jan 2025 - Feb 2025

Netflix Productions

Director's Assistant | Los Angeles, CA

Monster(s): The Lyle and Erik Menendez Story - Episodes 201 & 202

- Served as liaison between director Carl Franklin and production departments on a multimillion-dollar television production, coordinating time-sensitive information across stakeholders.
- Coordinated housing, technology, equipment, and other off-set operational requirements alongside changing production schedules.
- Managed and reported recurring expenditures for the director's off-set operations, maintained accurate records, and supported day-to-day decisions.

Oct 2023 - Mar 2024

ADDITIONAL EXPERIENCE

Various Production Companies

Freelance Set Production Assistant | Los Angeles, CA

- Coordinated real-time communication between production leadership and on-set teams, relayed changing requirements, managed production areas, and responded to time-sensitive logistics.
- Selected credits: Oppenheimer, Poolman, Monster: The Jeffrey Dahmer Story, and other feature and television productions.

2021 - 2023

Stanford University & Loyola Marymount University

NCAA Division I Men's Basketball Student-Athlete

- Five-year NCAA Division I student-athlete; three-time Pac-12 All-Academic selection and NABC Honors Court honoree.

2016 - 2021

EDUCATION

Loyola Marymount University

Master of Fine Arts, Film & Television Production (Directing Fiction)

2024

Stanford University

Bachelor of Arts, Film & Media Studies (Film, Media and Technology)

Relevant technical coursework: Programming Methodology, Programming Abstractions, Calculus I-III, Introductory Electronics I-II
